

DRAFT CONDITIONS 192-196 PRINCES HIGHWAY, KOGARAH BAY

SPECIFIC DEVELOPMENT CONDITIONS

Development Details

- Approved Plans** - The development must be implemented in accordance with the approved plans and supporting documentation listed below which have been endorsed by Council's approved stamp, except where marked up on the plans and/or amended by conditions of this consent:

Description	Reference No.	Date	Revision	Prepared by
Demolition, construction management and sediment control plan	DA004	30/03/20	A	Bureau SRH
B2 Basement Plan	DA101	13/4/21	D	Bureau SRH
B1 Basement Plan	DA102	13/4/21	D	Bureau SRH
Ground Floor Plan	DA103	13/4/21	D	Bureau SRH
Level 1-3 Floor Plans	DA104	13/4/21	D	Bureau SRH
Level 4 Floor Plan	DA105	13/4/21	D	Bureau SRH
Level 5 Floor Plan	DA106	13/4/21	D	Bureau SRH
Sixth Floor Plan (communal roof terrace)	DA107	13/4/21	D	Bureau SRH
North an East Elevations	DA201	13/4/21	D	Bureau SRH
South and West Elevations	DA202	13/4/21	D	Bureau SRH
Section	DA301	13/4/21	D	Bureau SRH
Longitudinal Section	DA301	13/4/21	D	Bureau SRH

Traffic and Parking Impact Assessment	20-028	March 2020		Stanbury Traffic Planning
Drainage Plans	2079 – S1/5 2079 – S2/5 2079 – S3/5 2079 – S4/5 2079 – S5/5	11.11.20 11.11.20 05.11.20 17.03.20 16.03.21	D D C B A	John Romanous & Associates P/L

Separate Approvals Required Under Other Legislation

2. **Vehicular Crossing** - The following vehicular crossing and road frontage works will be required to facilitate access to and from the proposed development site:
- (a) Construct a 1.2 metre wide footpath for the full length of the frontage of the site in accordance with Council's Specifications applying at the time construction approval is sought.
 - (b) The thickness and design of the driveway shall be in accordance with Council's Specifications applying at the time construction approval is sought.
 - (c) Any existing vehicular crossing and/or laybacks which are redundant must be removed. The kerb and gutter, any other footpath and turf areas shall be restored at the expense of the applicant. The work shall be carried out in accordance with Council's specification, applying at the time construction approval is sought.

Constructing a vehicular crossing and/or footpath requires separate approval under Section 138 of the Roads Act 1993, prior to the commencement of those works.

3. Below ground anchors - Information to be submitted with S68 Application under LGA 1993 and S138 Application under Roads Act 1993

- In the event that the excavation associated with the basement carpark is to be supported by the use of below ground (cable) anchors that are constructed under Council's roadways/footways, an application must be lodged with Council under Section 68 of the [Local Government Act 1993](#) and the [Roads Act 1993](#) for approval, prior to commencement of those works. The following details must be submitted.

- a) That cable anchors will be stressed released when the building extends above ground level to the satisfaction of Council.
- b) The applicant has indemnified Council from all public liability claims arising from the proposed works and provide adequate insurance cover to the satisfaction of Council.
- c) Documentary evidence of such insurance cover to the value of \$20 million.
- d) The applicant must register a non-terminating bank guarantee in favour of Council for the amount of \$50,000.

The guarantee will be released when the cables are stress released. In this regard it will be necessary for a certificate to be submitted to Council from a structural engineer at that time verifying that the cables have been stress released.

- e) That in the event of any works taking place on Council's roadways/footways adjoining the property while the anchors are still stressed, all costs associated with overcoming the difficulties caused by the presence of the 'live' anchors will be borne by the applicant.

4. Section 138 Roads Act 1993 and Section 68 Local Government Act 1993

- Unless otherwise specified by a condition of this consent, this Development Consent does not give any approval to undertake works on public infrastructure.

Separate approval is required under Section 138 of the [Roads Act 1993](#) and/or Section 68 of the [Local Government Act 1993](#) for any of the following activities carried out in, on or over a public road (including the footpath) listed below.

An application is required to be lodged and approved prior to the commencement of any of the following works or activities;

- (a) Placing or storing materials or equipment;
- (b) Placing or storing waste containers or skip bins;
- (c) Erecting a structure or carrying out work
- (d) Swinging or hoisting goods over any part of a public road by means of a lift, crane or the like;
- (e) Pumping concrete from a public road;
- (f) Pumping water from the site into the public road;
- (g) Constructing a vehicular crossing or footpath;
- (h) Establishing a "works zone";
- (i) Digging up or disturbing the surface of a public road (eg Opening the road for the purpose of connections to utility providers);

- (j) Stormwater and ancillary works in the road reserve;
- (k) Stormwater and ancillary to public infrastructure on private land; and
- (l) If any excavation is to be supported by the use of below ground (cable) anchors that are constructed under Council's roadways/footways.

These separate activity approvals must be obtained and evidence of the approval provided to the Certifying Authority prior to the issue of the Construction Certificate.

The relevant Application Forms for these activities can be downloaded from Council's website www.georgesriver.nsw.gov.au. For further information, please contact Council's Customer Service Centre on (02) 9330 6400.

- 5. **Road Opening Permit** - A Road Opening Permit must be obtained from Council, in the case of local or regional roads, or from the RMS, in the case of State roads, for every opening of a public road reserve to access services including sewer, stormwater drains, water mains, gas mains, and telecommunications before the commencement of work in the road.

Requirements of Concurrence, Integrated & Other Government Authorities

- 6. **Trade Waste Agreements** - A Trade Waste Agreement with Sydney Water may be required. Details of any work required to comply with the agreement must be detailed on the plans lodged with the Construction Certificate. If no trade waste agreement or grease trap is required, a letter from Sydney Water to this effect must be submitted with the application for the Construction Certificate.
- 7. **Sydney Airport** – The applicant must liaise with Sydney Airports. It is noted that approval to operate construction equipment (i.e. cranes) should be obtained prior to any commitment to construct. Should the height of any temporary structure and/or equipment be greater than 45.72 metres AEGH, a new approval must be sought in accordance with the Civil Aviation (Buildings Control) Regulations Statutory Rules 1988 No. 161. Construction cranes may be required to operate at a height significantly higher than that of the proposed development and consequently, may not be approved under the Airports (Protection of Airspace) Regulations. Sydney Airport advises that approval to operate construction equipment (i.e. cranes) should be obtained prior to any commitment to construct.
- 8. **Transport for New South Wales** -
 - 1. TfNSW has previously has previously vested a strip of land as road along the Princes Highway frontage of the subject property, as shown by grey colour on the attached Aerial – "X". The subject property (Lot 6 DP658231) is also affected by a Road Widening Order under Section 25 of the Roads Act, 1993 as published in Government Gazette 26 May 1993 and as shown by pink colour on the attached Aerial – "X".

As such, all new buildings or structures, together with any improvements integral to the future use of the site, are erected clear of the land reserved for road widening (unlimited in height or depth) and Princes Highway boundary.

2. The redundant driveways on Princes Highway are to be replaced with kerb and gutter to match existing. The design and construction of the kerb and gutter on Princes Highway shall be in accordance with TfNSW requirements. Details of these requirements should be obtained by email to DeveloperWorks.Sydney@rms.nsw.gov.au.

Detailed design plans of the proposed gutter crossing are to be submitted to TfNSW for approval prior to the issue of a Construction Certificate and commencement of any road works. Please send all documentation to development.sydney@rms.nsw.gov.au. A plan checking fee and lodgement of a performance bond is required from the applicant prior to the release of the approved road design plans by TfNSW.

3. Detailed design plans and hydraulic calculations of any changes to the stormwater drainage system are to be submitted to TfNSW for approval, prior to the commencement of any works. Please send all documentation to development.sydney@rms.nsw.gov.au.

A plan checking fee will be payable and a performance bond may be required before TfNSW approval is issued.

4. Sight distances from any proposed vehicular crossings are to be in accordance with the Austroads Guide to Road Design: Part 4A: Unsignalised and Signalised Intersections (Section 3 – Sight Distance) and AS 2890. Vegetation and proposed landscaping/fencing must not hinder sight lines to and from the vehicular crossings to motorists, pedestrians and cyclists.
5. The proposed development should be designed such that road traffic noise from Princes Highway is mitigated by durable materials in order to satisfy the requirements for habitable rooms under Clause 102 (3) of State Environmental Planning Policy (Infrastructure) 2007.
6. TfNSW is currently undertaking a program to implement “Clearways” on State roads within Sydney. If not already in place, “Clearway” restrictions will be implemented along the full Princes Highway frontage of the development site at no cost to TfNSW.
7. All demolition and construction vehicles are to be contained wholly within the site and vehicles must enter the site before stopping. A construction zone will not be permitted on Princes Highway.
8. A Road Occupancy Licence (ROL) should be obtained from Transport Management Centre for any works that may impact on traffic flows on Princes Highway during construction activities. A ROL can be obtained through <https://myrta.com/oplinc2/pages/security/oplincLogin.jsf>

In addition to the above, TfNSW provides the following advisory comment to the proponent for consideration:

1. TfNSW also advises that the subject property is within the broad investigation area for future sections of the M6 project. Please find

enclosed the June 2018 Project overview, which provides further information about the project, including a high level map.

The M6 Stage 1 (formerly f6 Extension Stage 1), between the New M5 Motorway at Arncliffe and President Avenue at Kogarah, is the first section of the proposed M6 project. The Minister for Planning and Public Spaces approved the Stage 1 in December 2019. Information about the M6 Stage 1 project is available on the project's interactive portal. To access the portal please visit: nswroads.work/M6portal. It is anticipated that Section B of the project will potentially run from Kogarah to Taren Point via Carlton and Sans Souci, while Section C will potentially run from Taren Point to the A1 Princes Highway in Loftus. There is currently no timeline, funding commitment or planning approval for Section B or Section C. However, the road corridor reserved since 1951 for future sections of the M6 will remain in place.

9. **Electricity Supply** - An application is required to be made to Ausgrid for a network connection. This may require the network to be extended or its capacity augmented. Evidence of this application being lodged with Ausgrid is required to be provided to the Certifying Authority prior to the issue of a Construction Certificate. For further details, you are advised to contact Ausgrid on 13 13 65 or www.ausgrid.com.au (Business and Commercial Services).
10. **Ausgrid - Overhead Powerlines** - Safe work NSW Document – Work Near Overhead Powerlines: Code of Practice, outlines the minimum safety separation requirements between these mains/poles to structures within the development throughout the construction process. It is a statutory requirement that these distances be maintained throughout construction. Special consideration should be given to the positioning and operating of cranes and the location of any scaffolding.

The “*as constructed*” minimum clearances to the mains should also be considered. These distances are outlined in the Ausgrid Network Standard, NS220 Overhead Design Manual. This document can be sourced from Ausgrid's website, www.ausgrid.com.au It remains the responsibility of the developer and relevant contractors to verify and maintain these clearances onsite. "Should the existing overhead mains require relocating due to the minimum safety clearances being compromised in either of the above scenarios, this relocation work is generally at the developers cost. It is also the responsibility of the developer to ensure that the existing overhead mains have sufficient clearance from all types of vehicles that are expected be entering and leaving the site."
11. **Connection to the network will be required prior to the release of any Occupation Certificate** - Where works within the road reserve are to be carried out by the developer, a Road Opening Permit must be obtained from Council's Customer Service Centre before commencement of work.
12. **Electricity Supply to Development** - The electricity supply to the Development must be underground.
13. **Sydney Water - Tap in TM** - The approved plans must be submitted to a

Sydney Water Tap in™ to determine whether the development application will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. The approved plans will be appropriately endorsed. For details please refer to 'Plumbing, building and developing' section of Sydney Water's web site at www.sydneywater.com.au then see 'Building', or telephone 13000 TAP IN (1300 082 746). The Certifying Authority must ensure that a Tap in™ agent has appropriately stamped the plans prior to the issue of the Construction Certificate.

14. **Notice of Requirements for a Section 73 Certificate** - A Notice of Requirements of what will eventually be required when issuing a Section 73 Compliance Certificate under the [Sydney Water Act 1994](#) must be obtained from Sydney Water Corporation. Application must be made through an authorised Water Servicing Co-ordinator. Please refer to the 'Plumbing, building and developing' section of the web site www.sydneywater.com.au then refer to 'Providers' under 'Developing' or telephone 13 20 92 for assistance.

Following application, a 'Notice of Requirements' will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Co-ordinator, as it can take some time to build water/sewer pipes and this may impact on other services and building, driveway or landscape design.

The Notice of requirements must be submitted prior to the commencement of work. A Section 73 Compliance Certificate will be required at the completion of development in accordance with further conditions.

Prior to the Issue of a Construction Certificate

15. **Low reflectivity roof** - Roofing materials must be low glare and reflectivity. Details of finished external materials including colours and texture must be provided to the Certifying Authority.
16. **Acoustic requirements – Compliance with submitted Acoustic Report** - The Construction Certificate plans shall demonstrate compliance with the Acoustic Assessment submitted to Council, titled "Acoustic Report – Traffic & Environmental Noise – for proposed development at No. 192 – 196 Princes Hwy Kogarah Bay. Reference No. 2020-048" prepared by Acoustic, Vibration & Noise Pty Ltd dated 17 March 2020.

This means that a review of glazing design and mechanical plant must be undertaken to ensure that acoustic objectives will be met. Written verification from a suitably qualified acoustic consultant must be submitted to Council validating that the acoustic objectives contained within the aforementioned report will be met, must be submitted to Council for approval. The Construction Certificate will not be issued until Council approves this validation.

In addition to the above, the Acoustic Report has specified that a test report is to be provided from a recognised acoustic laboratory, verifying that the glazing system (glass, frame and seals) will meet the nominated sound rating

required. A copy of this/these test reports must also be submitted to Council accompanying the aforementioned verification.

17. **Pre-Construction Dilapidation Report** - A professional engineer specialising in structural or geotechnical engineering shall prepare a Pre-Construction Dilapidation Report detailing the current structural condition of adjoining premises including but not limited to:

- a) All neighbouring buildings likely to be affected by the excavation as determined by the consulting engineer.

The report shall be prepared at the expense of the applicant and submitted to the satisfaction of the Certifying Authority prior to the issue of the Construction Certificate.

A copy of the pre-construction dilapidation report is to be provided to the adjoining properties (subject of the dilapidation report), a minimum of 5 working days prior to the commencement of work. Evidence confirming that a copy of the pre-construction dilapidation report was delivered to the adjoining properties must be provided to the PCA.

Should the owners of properties (or their agents) refuse access to carry out inspections, after being given reasonable written notice, this shall be reported to Council to obtain Council's agreement to complete the report without access. Reasonable notice is a request for access in no sooner than 14 days between 8.00am-6.00pm.

18. **On Site Detention** - The submitted stormwater plan has been assessed as a concept plan only. Final detailed plans of the drainage system, prepared by a professional engineer specialising in hydraulic engineering, shall be submitted for approval with the Construction Certificate.

An on-site detention (OSD) facility designed by a professional engineer who specialises in Hydraulic Engineering must be designed, approved and installed. The design must include the computations of the inlet and outlet hydrographs and stage/storage relationships of the proposed OSD using the following design parameters:

- a) peak flow rates from the site are to be restricted to a permissible site discharge (PSD) equivalent to the discharge when assuming the site contained a single dwelling, garage, lawn and garden,
b) at Annual Recurrence Intervals of 2 years and 100 years.

Refer to Flow Controls in Council's Draft/Adopted Stormwater Drainage Policy.

The OSD facility shall be designed to meet all legislated safety requirements and childproof safety fencing around the facility must be provided where the OSD facility is open or above ground when the design peak storage depth is greater than 300mm. A durable metal plate or similar sign is to be placed at the OSD facility and must bear the words:

"BEWARE: This is an on-site detention basin/tank for rainwater which could overflow during heavy storms."

Full details shall accompany the application for the Construction Certificate.

19. **Detailed Stormwater Drainage Design** - The submitted stormwater plan has been assessed as a concept plan only. A detailed drainage design supported by a catchment area plan and drainage calculations (including a Hydraulic Grade Line Analysis) must be submitted with the Construction Certificate application.

20. **NBN Connection** - Prior to the issue of the Subdivision or Construction Certificate in connection with a development, the developer (whether or not a constitutional corporation) is to provide evidence satisfactory to the Certifying Authority that arrangements have been made for:

i) the installation of fibre-ready facilities to all individual lots and/or premises in a real estate development project so as to enable fibre to be readily connected to any premises that is being or may be constructed on those lots. Demonstrate that the carrier has confirmed in writing that they are satisfied that the fibre ready facilities are fit for purpose; and

(ii) the provision of fixed-line telecommunications infrastructure in the fibre-ready facilities to all individual lots and/or premises in a real estate development project demonstrated through an agreement with a carrier.

(Note real estate development project has the meanings given in section 372Q of the Telecommunications Act).

21. **Council Property Shoring** - Prior to the issue of the Construction Certificate, plans and specifications prepared by a professional engineer specialising in practising structural engineering must detail how Council's property shall be supported at all times.

Where any shoring is to be supporting, or located on Council's property, certified structural engineering drawings detailing; the extent of the encroachment, the type of shoring and the method of removal, shall be included on the plans. Where the shoring cannot be removed, the plans must detail that the shoring will be cut to 150mm below footpath level and the gap between the shoring and any building shall be filled with a 5MPa lean concrete mix.

22. **Fire Safety Measures** - Prior to the issue of a construction certificate a list of the essential fire safety measures that are to be provided in relation to the land and any building on the land as a consequence of the building work must accompany an application for a construction certificate, which is required to be submitted to either Council or a PCA. Such list must also specify the minimum standard of performance for each essential fire safety measure included in the list. The Council or PCA will then issue a Fire Safety Schedule for the building.

23. **Allocation of street addresses** - In order to comply with AS/NZS 4819:2011

Rural and Urban Addressing, the NSW Addressing User Manual (Geographical Names Board of NSW) and Georges River Council's requirements, the street address for the subject development is allocated as follows:

Primary Address

1A Lacey Street KOGARAH BAY NSW 2217

24. **Damage Deposit - Major Works** - In order to insure against damage to Council property the following is required:

- (a) Pay Council, before the issue of the Construction Certificate, a damage deposit for the cost of making good any damage caused to any Council property as a result of the development: \$102,754.00 (Not inclusive of drainage works).
- (b) Pay Council, before the issue of the Construction Certificate, a non-refundable inspection fee to enable assessment of any damage and repairs where required: \$742.00
- (c) Submit to Council, before the commencement of work, a dilapidation report of the condition of the Council nature strip, footpath and driveway crossing, or any area likely to be affected by the proposal.

At the completion of work Council will review the dilapidation report and the Works-As-Executed Drawings (if applicable) and inspect the public works.

The damage deposit will be refunded in full upon completion of work where no damage occurs and where Council is satisfied with the completion of works. Alternatively, the damage deposit will be forfeited or partly refunded based on the damage incurred.

- 25. **Engineer's Certificate** - A certificate from a professional Engineer specialising in structural engineering certifying the structural adequacy of the existing structure, to support all proposed additional superimposed loads shall be submitted to the Certifying Authority prior to the issue of the Construction Certificate.
- 26. **Access for Persons with a Disability** - Access and or sanitary facilities for persons with disabilities must be provided to the premises/building in accordance with the requirements of the Premises Standards, the Building Code of Australia, and AS 1428.1. Details must be submitted with the Construction Certificate Application for approval.
- 27. **Geotechnical report** - The applicant must submit a Geotechnical Report, prepared by a professional engineer specialising in geotechnical engineering who holds the relevant Certificate of accreditation as required under the Building Professionals Act 2005 in relation to dilapidation reports, all site works and construction. This is to be submitted before the issue of the Construction Certificate and is to include:

- (a) Investigations certifying the stability of the site and specifying the design constraints to be placed on the foundation, any earthworks/stabilization works and any excavations.
- (b) Dilapidation Reports on the adjoining properties including, but not limited to adjoining properties prior to any excavation of site works. The Dilapidation Report is to include assessments on, but not limited to, the dwellings at those addresses and any external paths, grounds etc. This must be submitted to the PCA and the adjoining residents as part of the application for the Construction Certificate. Adjoining residents are to be provided with the report five (5) working days prior to any works on the site.
- (c) On-site guidance by a vibration specialist during the early part of excavation.
- (d) Measures to minimise vibration damage and loss of support to other buildings. Where possible any excavation into rock is to be carried out with tools such as rock saws which reduce vibration to adjoining buildings and associated structures. Where a hydraulic hammer is to be used within 30 metres of any building (other than a path or a fence) the report shall detail the maximum size of hammer to be used and provide all reasonable recommendations to manage impacts.
- (e) Sides of the excavation are to be pierced prior to any excavation occurring to reinforce the walls of the excavation to prevent any subsidence to the required setbacks and neighbouring sites.

28. **Construction Traffic Management Plan** - A Construction Traffic Management Plan detailing:

- (a) construction vehicle routes;
- (b) anticipated number of trucks per day;
- (c) hours of construction;
- (d) Access arrangements; and

Proposed traffic measures to minimise impacts of construction vehicles must be submitted for the approval of Council's Engineers. Council's Engineers must specify in writing that they are satisfied with the Traffic Management Plan prior to the issue of the Construction Certificate.

29. **Car Wash Bay** - Plans and specifications of the car washing system which has been approved by Sydney Water must be submitted with the application for the Construction Certificate.

All car washing bays shall be contained within a roofed and bunded car wash bay with pre-treatment approved by Sydney Water. The water from the car wash bay must be graded to a drainage point and connected to sewer.

If alternative water management and disposal options are proposed (i.e. where water is recycled, minimised or reused on the site), detailed plans and specifications of the water recycling system must be submitted with the application for the Construction Certificate for approval.

30. **SEPP 65 Design Verification Statement** - A design verification statement, prepared by a qualified designer, shall be submitted to the Certifying Authority verifying that the plans and specifications achieve or improve the design

quality of the development for which development consent was granted, having regard to the design quality principles set out under Schedule 1 of [State Environmental Planning Policy No 65 -Design Quality of Residential Flat Development](#).

31. **Waste Handling Systems** - All waste handling equipment and systems used in conjunction with the provision of waste and recycling services shall be manufactured, installed and maintained in accordance with any applicable regulatory requirements, relevant Australian Standards, and relevant manufacturer's specifications.
32. **Tree Removal prohibited** - This consent does not approve the removal or pruning (branches or roots) of any trees on the subject property, Council's public footway, public reserves or on neighbouring properties unless specifically referenced in this consent.
33. **Fees to be paid** - The fees listed in the table below must be paid in accordance with the conditions of this consent and Council's adopted Fees and Charges applicable at the time of payment (available at www.georgesriver.nsw.gov.au).

Payments must be made prior to the issue of the Construction Certificate or prior to the commencement of work (if there is no associated Construction Certificate).

Please contact Council prior to the payment of Section 7.11 Contributions to determine whether the amounts have been indexed from that indicated below in this consent and the form of payment that will be accepted by Council.

Council will only accept Bank Cheque or Electronic Funds Transfer (EFT) for transaction values of \$500,000 or over. Council must be contacted prior to payment to determine correct total amount to be paid and bank account details (if applicable).

A summary of the fees to be paid are listed below:

Fee Type	Fee
GENERAL FEES	
Long Service Levy (to Long Service Corporation) Or, provide evidence of Payment direct to the Long Service Corporation. See https://portal.longservice.nsw.gov.au/bci/levy/	
Builders Damage Deposit	\$102,754.00
Inspection Fee for Refund of Damage Deposit	\$742.00
DEVELOPMENT CONTRIBUTIONS	
KOGARAH	
Kogarah Section 7.11 Development Contributions Plan No.1 - Roads and Traffic Management - Residential	\$7,411.88
Kogarah Section 7.11 Development Contributions Plan No.5 - Open Space 2007	\$382,209.99
Kogarah Section 7.11 Development Contributions Plan No.9 - Kogarah Libraries - Buildings	\$6,121.17

Kogarah Section 7.11 Development Contributions Plan No.9 - Kogarah Libraries - Books	\$8,585.32
Total	\$404,328.36

General Fees

The fees and charges above are subject to change and are as set out in the version of Council's Schedule of Fees and Charges or as required by other Government Authorities, applicable at the time of payment.

Development Contributions

The Section 7.11 contribution is imposed to ensure that the development makes adequate provision for the demand it generates for public amenities and public services within the area.

Indexation

The above contributions will be adjusted at the time of payment to reflect changes in the cost of delivering public amenities and public services, in accordance with the indices provided by the relevant Section 7.11 Development Contributions Plan.

Timing of Payment

The contribution must be paid and receipted by Council prior to the release of the Construction Certificate.

Further Information

A copy of the *all current Development Contributions Plans* may be inspected or a copy purchased at Council's offices (Georges River Civic Centre, MacMahon Street, Hurstville and Kogarah Library and Service Centre, Kogarah Town Square, Belgrave Street, Kogarah) or viewed on Council's website www.georgesriver.nsw.gov.au.

34. **Site Management Plan** - A Site Management Plan must be submitted with the application for a Construction Certificate, and include the following:
- a) location of protective site fencing;
 - b) location of site storage areas/sheds/equipment;
 - c) location of building materials for construction, e.g. stockpiles
 - d) provisions for public safety;
 - e) dust control measures;
 - f) method used to provide site access location and materials used;
 - g) details of methods of disposal of demolition materials;
 - h) method used to provide protective measures for tree preservation;
 - i) provisions for temporary sanitary facilities;
 - j) location and size of waste containers/skip bins;
 - k) details of proposed sediment and erosion control measures;
 - l) method used to provide construction noise and vibration management;
 - m) construction and demolition traffic management details.

The site management measures are to be implemented prior to the commencement of any works including demolition and excavation. The site management measures are to be maintained throughout the works, to

maintain reasonable levels of public health, safety and amenity. A copy of the Site Management Plan must be kept on site and is to be made available upon request.

35. **BASIX Commitments** - All energy efficiency measures as detailed in the BASIX Certificate 1087636M dated 19 March 20 prepared by Greenwood Architectural Drafting must be implemented on the plans lodged with the application for the Construction Certificate.
36. **Required design changes** - The following changes are required to be made and shown on the Construction Certificate plans:

Front fence gate access.	Each unit fronting the Princes Highway and Lacey Street must have a front gate providing direct access the street.
Waste Requirements	The level B2 storage area is to be amended to accommodate waste storage. Individual basement storage areas for units maybe located within overhead car parking storage.
Location of OSD Tank	The OSD tank is to be located outside the habitable areas of the proposed building.

37. **Erosion & Sedimentation Control** - Erosion and sediment controls must be provided to ensure:
- (a) Compliance with the approved Erosion & Sediment Control Plan
 - (b) Removal or disturbance of vegetation and top soil is confined to within 3m of the approved building area (no trees to be removed without approval)
 - (c) All clean water runoff is diverted around cleared or exposed areas
 - (d) Silt fences, stabilised entry/exit points or other devices are installed to prevent sediment from entering drainage systems or waterways
 - (e) All erosion and sediment controls are fully maintained for the duration of demolition, excavation and/or development works
 - (f) Controls are put into place to prevent tracking of sediment by vehicles onto adjoining roadway
 - (g) All disturbed areas are rendered erosion-resistant by turfing, mulching, paving or similar
 - (h) Compliance with [Managing Urban Stormwater - Soils and Construction \(Blue Book\) produced by Landcom 2004.](#)

These measures are to be implemented prior to the commencement of work (including demolition and excavation) and must remain until works are completed and all exposed surfaces are landscaped/sealed.

38. **Stormwater System** - The submitted stormwater plan has been assessed as a concept plan only. Final detailed plans of the drainage system, prepared by a professional engineer specialising in hydraulic engineering, shall be submitted for approval with the Construction Certificate.
- (a) All stormwater shall drain by gravity to the stormwater kerb inlet pit in the Princes Highway in accordance with the Australian/New Zealand

Standard AS/NZS 3500.3: 2015 (as amended) and to the satisfaction of the relevant authority of the Princes Highway (RMS).

- (b) The PCA shall ensure that the existing public utility services within the nature strip under the footpath area, would not blocking the site stormwater discharge pipe from connecting into the drainage kerb inlet pit.
- (c) The PCA shall ensure that the approved drainage design levels are to be surveyed during construction by a registered surveyor.
- (d) The PCA shall ensure that a drainage engineer shall supervise the construction of the OSD stormwater system on site and certify his supervision in writing and state his satisfaction of the constructed site stormwater system is built as intended in this consent.
- (e) The stormwater drainage plans including pipe sizes, type, grade, length, invert levels, dimensions and types of drainage pits prepared by a professional engineer who specialises in Hydraulic Engineering in accordance with the Australian Institute of Engineers Australian Rainfall and Runoff (1987) and Council's Stormwater Drainage Guidelines, shall accompany the application for the Construction Certificate.

Design details and certifications shall be submitted for approval with the Construction Certificate application.

Stormwater Systems with Basement

- (a) The underground basement car park must pump to and all other stormwater must drain by gravity to:
 - i. the drainage system within the site via a silt trap pit .

The design of the proposed drainage system must be prepared by a professional engineer who specialises in hydraulic engineering and be submitted for approval with the Construction Certificate application.

Protection of basement from inundation of stormwater waters

- (b) The protection of the underground basement shall be protected from possible inundation by surface waters from the street.
Evidence from a professional engineer who specialises in hydraulic engineering that this design requirement has been adhered to shall be submitted with the Construction Certificate application.

- 39. **Structural details** - Engineer's details prepared by a practising Structural Engineer being used to construct all reinforced concrete work, structural beams, columns and other structural members. The details are to be submitted to the Principal Certifying Authority for approval prior to construction of the specified works.
A copy shall be forwarded to Council where Council is not the PCA.
- 40. **Traffic Management - Compliance with AS2890** - All driveways, access ramps, vehicular crossings and car parking spaces shall be designed and constructed in accordance with the current version of Australian Standards, AS 2890.1 (for car parking facilities).

41. **Pump-Out System Design for Stormwater Disposal** The design of the pump-out system for storm water disposal will be permitted for drainage of basement areas only, and must be designed in accordance with the following criteria:
- (a) The pump system shall consist of two pumps, connected in parallel, with each pump being capable of emptying the holding tank at the rate equal to the rate of inflow for the one-hour duration storm. The holding tank shall be capable of holding one hour's runoff from a one-hour duration storm of the 1 in 20 year storm;
 - (b) The pump system shall be regularly maintained and serviced, every six (6) months; and
 - (c) Any drainage disposal to the street gutter from a pump system must have a stilling sump provided at the property line, connected to the street gutter by a suitable gravity line.

Details and certification of compliance from a professional engineer specialising in civil engineering shall be provided for approval with the Construction Certificate application.

42. **Waste Management Plan** - A Waste Management Plan incorporating all requirements in respect of the provision of waste storage facilities, removal of all materials from the site that are the result of site clearing, extraction, and, or demolition works and the designated Waste Management Facility shall be submitted to the Certifying Authority prior to the issue of any Construction Certificate.
43. **Landscape Plan** - A detailed landscape plan, drawn to scale, by a qualified landscape architect or landscape designer, must be submitted prior to the issue of the Construction Certificate. The plan must include:
- (a) Location of existing and proposed structures, services and existing trees;
 - (b) Details of earthworks including mounding and retaining walls and planter boxes;
 - (c) Location of proposed plants and a plant schedule showing the plant symbol, botanical name/ common name; quantity; pot size/; and mature height x width.
 - (d) Details of planting procedure and maintenance;
 - (e) Landscape specification;
 - (f) Details of drainage and watering systems;
 - (g) Details of garden edging and turf; and
 - (h) Any required fencing, retaining walls and other structures not shown on other approved architectural and engineering plans.

44. **Landscape Plans** - All landscape works shall be carried out in accordance with the approved landscape plans. The landscaping shall be maintained in accordance with the approved plans in perpetuity. The landscaping shall be maintained in accordance with the approved plans in perpetuity, subject to the following –

- a) The proposed twenty eight (28) trees and plant species, pot/ bag size and quantities of plants shall be in accordance with the proposed plant schedule

upon the landscape plan. If plant species, pot/ bag size and quantities cannot be sourced, Council shall be contacted for alternatives;

- b) All twenty eight (28) trees proposed upon the approved landscape plan shall comply with AS 2303 – 2018, Tree Stock for Landscape use and NATSPEC Specifying Trees: a guide to assessment of tree quality (2003), and be planted and maintained in accordance with Councils standard specification;
- c) If the planted twenty eight (28) trees and plants are found to be faulty, damaged, dying or dead within twelve (12) months of planting then they must be replaced with the same species. If the trees are found dead before they reach a height where they are protected by Councils Tree Management Controls, they must be replaced with the same species and pot/bag size;

45. **Tree Protection and Retention** - The following trees shall be retained and protected:

Tree Species	Location of Tree / Tree No.	Tree Protection Zone (metres) TPZ as per AS4970 -2009 Fencing distance from trunk
Phoenix canariensis x 2	Within 198 Princes Highway, rear yard side fence	3.5 metres radially

- a) The client shall engage a qualified Arborist who holds an AQF Level 5 or above in Arboriculture and who is a current practicing and financial member of an Arboricultural Association or Affiliation, with a letter of engagement forwarded to the nominated PCA.
- b) A certificate of compliance letter from the AQF 5 Arborist must be forwarded to the PCA – Principal Certifying Authority, at a minimum three (3) stages being, before works, during works and once all building works have been completed, that tree protection measures have been installed and being maintained during the building process.

Tree Protection Measures

- c) The tree protection measures must be in undertaken in accordance AS4970 -2009 Protection of trees on development sites.
- d) All trees on Council property, subject site and adjacent sites, to be retained must be protected before site set up and maintained during demolition, excavation and construction of the site.
- e) Although trees may be on adjacent sites, the tree protection fencing must be placed on the nominated distances as per table above, out from the trees trunk, within the subject site to minimise impacts to neighbours trees and kept for the entirety of the project.
- f) Details of the tree protection measures to be implemented must be

provided with the application for a Construction Certificate by a qualified Arborist who holds an AQF Level 5 or above in Arboriculture and who is a current practicing and financial member of an Arboricultural Association or Affiliation.

- g) The engaged AQF 5 Consulting Project Arborist must be present on-site during the stages of site set up, excavation, demolition and construction when works are being undertaken that could impact on the tree canopy or root zone within the tree protection zone of each tree.
- h) In accordance with AS 4970-2009 Protection of trees on development sites, a protective fence consisting of 2.4 x 1.8 metres high, fully supported chainmesh fence shall be used. The distance of the fence out from the base of each tree is to be in accordance with the TPZ listed in the table above. A layer of organic mulch 100 millimetres thick shall be placed over the protected area and no soil or fill should be placed within the protection area.
- i) The tree protection fencing must be kept in place during demolition, excavation and construction and also have a sign displaying 'Tree Protection Zone – DO NOT ENTER' attached to the fence and must also include the name and contact details of the Project Arborist.
- j) The Tree Protection Zone of each tree, to be protected, shall be watered thoroughly and regularly to minimise the effects of construction works.
- k) No building products, preparation of building products, storage of materials, stockpiling, site sheds or services shall be installed within the TPZ of the trees to be retained.

Excavation works near tree to be retained

- l) Excavations around the trees to be retained on site, Councils street verge or the adjoining properties shall be supervised by the AQF 5 Project Arborist to ensure that the root system will not adversely be affected.
- m) Where the Tree Protection Zone (TPZ) of trees on site or adjoining sites become compromised by any excavation works, the AQF 5 Project arborist shall be consulted to establish the position of any major roots and determine the necessary measures to protect these roots. The recommendations of the Arborist shall be submitted to Council prior to any further demolition or construction works taking place.
- n) Tree Protection Zones around the trees to be retained are not to have soil level changes, building product / materials stored or services installed in this area.

46. **Tree Removal & Replacement - Tree removal** - Permission is granted for the removal of the following trees:

Tree Species	Number of trees	Location
Dracaena marginata	X1	Located within rear of No 196 Princes Highway.

General Tree Removal Requirements

- a) All tree removal shall be carried out by a minimum certificate Level 3, Licenced and insured Tree Surgeon/Arborist to ensure that removal is undertaken in a safe manner and complies with the AS 4373-2007 - Pruning of Amenity Trees and Tree Works Industry Code of Practice (Work Cover NSW 1.8.98).
- b) No trees are to be removed on the site or neighbouring properties without the prior written approval of Council.

Street Tree Removal / Replacement by Council

- a) Three (3) street trees of species to be determined must be provided in the road reserve fronting the site from Lacey Street.
- b) Council shall be appointed to remove and plant all tree/s on public land. All costs associated with the removal of the tree/s and the planting of replacement trees shall be met by the applicant. Fees and charges outlined in the table below are subject to change and are set out in the current version of Council's 'Schedule of Fees and Charges', applicable at the time of payment.
- c) The fees must be paid in accordance with the conditions of this consent. The fee payable is to ensure that the development makes adequate provision for the demand it generates for public amenities and public services within the area.
- d) The fees payable will be adjusted at the time of payment to reflect changes in the cost of delivering public amenities and public services, in accordance with the indices provided by the relevant conditions set out in this consent.

Fee Type – Tree planting on public land	Number of trees	Amount per tree
Administration Fee, tree planting and maintenance	X3	\$452.00
Cost of tree removal (Pittosporum rhombifolium)	X1	To be determined
Cost of Stump Grinding (Pittosporum rhombifolium)	X1	To be determined

Prior to the Commencement of Work (Including Demolition & Excavation)

47. **Dilapidation Report on Public Land - Major Development Only** - Prior to the commencement of works (including demolition and excavation), a dilapidation report must be prepared for the Council infrastructure adjoining the development site, including all adjoining property.

The report must include the following:

- a) Photographs showing the existing condition of the road pavement fronting

- the site,
- b) Photographs showing the existing condition of the kerb and gutter fronting the site,
- c) Photographs showing the existing condition of the footpath pavement fronting the site,
- d) Photographs showing the existing condition of any retaining walls within the footway or road, and
- e) Closed circuit television/video inspection (in DVD format) of public stormwater drainage systems fronting, adjoining or within the site, and
- f) The full name and signature of the structural engineer.
- g) The Dilapidation Report must be prepared by a qualified structural engineer. The report must be provided to the PCA and a copy provided to the Council.

The Dilapidation Report must be prepared by a professional engineer. The report must be provided to the PCA and a copy provided to the Council.

The report is to be supplied in electronic format in Word or PDF. Photographs are to be in colour, digital and date stamped.

Note: Council will use this report to determine whether to refund the damage deposit after the completion of works.

48. **Demolition & Asbestos** - The demolition work shall comply with the provisions of Australian Standard AS2601:2001 - Demolition of Structures, NSW [Work Health & Safety Act 2011](#) and the NSW [Work Health & Safety Regulation 2011](#). The work plans required by AS2601:2001 shall be accompanied by a written statement by a suitably qualified person that the proposals contained in the work plan comply with the safety requirements of the Standard. The work plans and the safety statement shall be submitted to the PCA prior to the commencement of works.

For demolition work which involves the removal of asbestos, the asbestos removal work must be carried out by a licensed asbestos removalist who is licensed to carry out the work in accordance with the [NSW Work Health & Safety Act 2011](#) and the NSW [Work Health & Safety Regulation 2011](#) unless specified in the Act and/or Regulation that a license is not required.

All demolition work including the removal of asbestos, shall be undertaken in accordance with the [Demolition Code of Practice](#) (NSW Work Cover July 2015).

Note: Copies of the Act, Regulation and Code of Practice can be downloaded free of charge from the SafeWork NSW website: www.SafeWork.nsw.gov.au.

49. **Demolition Notification Requirements** - The following notification requirements apply to this consent:

- (a) The developer /builder must notify adjoining residents five (5) working days prior to demolition. Such notification is to be a clearly written note giving the date demolition will commence, contact details of the developer/builder, licensed asbestos demolisher and the appropriate

regulatory authority. Notification is to be placed in the letterbox of every premises (including every residential flat or unit, if any) either side and immediately at the rear of the demolition site.

- (b) Five (5) working days prior to demolition, the developer/builder is to provide written notification to Council advising of the demolition date, details of the SafeWork licensed asbestos demolisher and the list of residents advised of the demolition.
 - (c) On demolition sites where buildings to be demolished contain asbestos, a standard commercially manufactured sign containing the words "DANGER ASBESTOS REMOVAL IN PROGRESS" measuring not less than 400mm x 300mm is to be erected in a prominent visible position (from street frontage) on the site. The sign is to be erected prior to demolition work commencing and is to remain in place until such time as all asbestos material has been removed from the site to an approved waste facility.
50. **Dial before your dig** - The applicant shall contact "Dial Before You Dig on 1100" to obtain a Service Diagram prior to the issuing of the Construction Certificate. The sequence number obtained from "Dial Before You Dig" shall be forwarded to the Principal Certifying Authority (PCA) and Council for their records.
51. **Demolition work involving asbestos removal** - Work involving bonded asbestos removal work (of an area of more than 10 square metres) or friable asbestos removal work must be undertaken by a person who carries on a business of such removal work in accordance with a licence under clause 458 of the [Work Health and Safety Regulation 2011](#).
52. **Registered Surveyors Report - During Development Work** - A report must be submitted to the PCA at each of the following applicable stages of construction:
- a) Set out before commencing excavation.
 - b) Floor slabs or foundation wall, before formwork or commencing brickwork.
 - c) Completion of Foundation Walls - Before any construction of flooring, detailing the location of the structure relative to adjacent boundaries and floor levels relative to the datum shown on the approved plans.
 - d) Completion of Floor Slab Formwork - Before pouring of concrete/walls construction, detailing the location of the structure relative to adjacent boundaries and floor levels relative to the datum shown on the approved plans. In multi-storey buildings a further survey must be provided at each subsequent storey.
 - e) Completion of any Pool Formwork - Before concreting of pool shell, detailing the location of the pool relative to the adjacent boundaries and its height relative to the datum shown on the approved plans.
 - f) Completion of any Roof Framing - Before roof covered detailing eaves/gutter setback from boundaries.
 - g) Completion of all Work - Detailing the location of the structure (including eaves/gutters) relative to adjacent boundaries and its height relative to

the datum shown on the approved plans. A final Check Survey must indicate the reduced level of the main ridge.

Work must not proceed beyond each stage until the PCA is satisfied that the height and location of the building is proceeding in accordance with the approved plans.

53. **Utility Arrangements** - Arrangements are to be made with utility authorities in respect to the services supplied by those authorities to the development. The cost associated with the provision or adjustment of services within the road and footway areas is to be at the applicant's expense.

During Construction

54. **Physical connection of Stormwater to site** - No work is permitted to proceed above the ground floor slab level of the building until there is physical connection of the approved stormwater drainage system as indicated on the approved stormwater plans.
55. **Site sign - Soil & Erosion Control Measures** - Prior to the commencement of works (including demolition and excavation), a durable site sign, issued by Council in conjunction with this consent, must be erected in a prominent location on site. The site sign warns of the penalties which apply to pollution, storing materials on road or footpath and breaches of the conditions relating to erosion and sediment controls. The sign must remain in a prominent location on site up until the completion of all site and building works.
56. **Site contamination – Additional information** - Any new information that comes to light during demolition or construction which has the potential to alter previous conclusions about site contamination and remediation must be notified to Council and the accredited certifier immediately.

It is mandatory that this information is reported to Council in order to comply with Section 148 of the POEO Act 1997 and Section 60 of the CLM Act 1997.

57. **Hours of construction for demolition and building work** - Any work activity or activity associated with the development consent that requires the use of any tools (including hand tools) or any power operated plant and machinery that creates noise on or adjacent to the site shall not be performed, or permitted to be performed, except between the hours of 7.00 am to 5.00 pm, Monday to Saturday inclusive. No work or ancillary activity is permitted on Sundays, or Public Holidays.

Note: A penalty infringement notice may be issued for any offence.

58. **Ground levels and retaining walls** - The ground levels of the site shall not be excavated, raised or filled, or retaining walls constructed on the allotment boundary, except where indicated on approved plans or approved by Council.
59. **Cost of work to be borne by the applicant** - The applicant shall bear the cost of all works associated with the construction of the development that occurs on Council property. Care must be taken to protect Council's roads,

including the made footway, kerbs, etc., and, where plant and vehicles enter the site, the footway shall be protected against damage by deep-sectioned timber members laid crosswise, held together by hoop iron straps and chamfered at their ends. This construction shall be maintained in a state of good repair and condition throughout the course of construction.

60. **Obstruction of Road or Footpath** - The use of the road or footpath for the storage of any building materials, waste materials, temporary toilets, waste or skip bins, or any other matter is not permitted unless separately approved by Council under Section 138 of the [Roads Act 1993](#) and/or under Section 68 of the [Local Government Act 1993](#). Penalty infringement Notices may be issued for any offences and severe penalties apply.
61. **Tree Removal on Private Land** - The trees identified as 'to be removed/pruned' on the approved plans or by conditions of this consent shall be removed in accordance with *AS4373 -2007* and the *Amenity Tree Industry Code of Practice* (SafeWork NSW, August 1998).
62. **Waste Management Facility** - All materials removed from the site as a result of demolition, site clearing, site preparation and, or excavation shall be disposed of at a suitable Waste Management Facility. No vegetation, article, building material, waste or the like shall be ignited or burnt.

Copies of all receipts for the disposal, or processing of all such materials shall be submitted to the PCA and Council, where Council is not the Principal Certifying Authority.

63. **Excavation works near tree to be retained** - Excavation around the tree/s to be retained on site or the adjoining properties shall be supervised by the Project Arborist to ensure that the root system will not be adversely affected. Where the Tree Protection Zone of trees on site or adjoining sites become compromised by any excavation works, the Project Arborist shall be consulted to establish the position of any major roots and determine the necessary measures to protect these roots. The recommendations of the Arborist shall be submitted to Council prior to any further demolition or construction works taking place.

Prior to the issue of the Occupation Certificate

64. **Major Development** - Internal driveways and parking spaces are to be adequately paved with concrete or bitumen, or interlocking pavers to provide a dust-free surface. All car parking spaces are to be line marked in accordance with AS1742, 'Australian Standard Manual of Uniform Traffic Control Devices' and the relevant guidelines published by the RMS.
65. **SEPP 65 Design Verification Statement** - The PCA must not issue an Occupation Certificate to authorise a person to commence occupation of the residential flat development unless the PCA has received a design verification from a qualified designer, being a statement in which the qualified designer verifies that the residential flat development achieves the design quality of the development as shown in the plans and specifications in respect of which the construction certificate was issued, having regard to the design quality

principles set out in Part 2 of [State Environmental Planning Policy No 65 Design Quality of Residential Flat Development](#).

66. **Restriction to User and Positive Covenant for On-Site Detention Facility**
- A Restriction on Use of the Land and Positive Covenant shall be created and registered on the title of the property, which places the responsibility for the maintenance of the on-site stormwater management system on the owners of the land. The terms of the instrument are to be in accordance with Council's standard terms and restrictions which are as follows:

Restrictions on Use of Land

The registered proprietor shall not make or permit or suffer the making of any alterations to any on-site stormwater management system which is, or shall be, constructed on the lot(s) burdened without the prior consent in writing of Georges River Council. The expression "on-site stormwater management system" shall include all ancillary gutters, pipes, drains, walls, kerbs, pits, grates, tanks, chambers, basins and surfaces designed to manage stormwater quantity or quality including the temporary detention or permanent retention of stormwater storages. Any on-site stormwater management system constructed on the lot(s) burdened is hereafter referred to as "the system".

Name of Authority having the power to release, vary or modify the Restriction referred to is Georges River Council.

Positive Covenants

1. *The registered proprietor of the lot(s) hereby burdened will in respect of the system:*
 - a) *keep the system clean and free from silt, rubbish and debris*
 - b) *maintain and repair at the sole expense of the registered proprietors the whole of the system so that it functions in a safe and efficient manner*
 - c) *permit the Council or its authorised agents from time to time and upon giving reasonable notice (but at any time and without notice in the case of an emergency) to enter and inspect the land for the compliance with the requirements of this covenant*
 - d) *comply with the terms of any written notice issued by the Council in respect of the requirements of this covenant within the time stated in the notice.*

2. *Pursuant to Section 88F(3) of the Conveyancing Act 1919 the Council shall have the following additional powers:*
 - a) *in the event that the registered proprietor fails to comply with the terms of any written notice issued by the Council as set out above the Council or its authorised agents may enter the land with all necessary materials and equipment and carry out any work which the Council in its discretion considers reasonable to comply with the said notice referred to in part 1(d) above*
 - b) *the Council may recover from the registered proprietor in a Court of competent jurisdiction:*
 - i. *any expense reasonably incurred by it in exercising its powers*

under subparagraph (i) hereof. Such expense shall include reasonable wages for the Council's employees engaged in effecting the work referred to in (i) above, supervising and administering the said work together with costs, reasonably estimated by the Council, for the use of materials, machinery, tools and equipment in conjunction with the said work.

ii. legal costs on an indemnity basis for issue of the said notices and recovery of the said costs and expenses together with the costs and expenses of registration of a covenant charge pursuant to section 88F of the Act or providing any certificate required pursuant to section 88G of the Act or obtaining any injunction pursuant to section 88H of the Act. Name of Authority having the power to release vary or modify the Positive Covenant referred to is Georges River Council.

67. **Consolidation of Site** - The site shall be consolidated into one allotment and by a Plan of Consolidation being prepared by a Registered Surveyor. This Plan shall be registered at the NSW Land and Property Information prior to the issue of a final occupation certificate.
68. **Maintenance Schedule – On-site Stormwater Management** - A Maintenance Schedule for the proposed on-site stormwater management measures is to be prepared and submitted to Council. The Maintenance Schedule shall outline the required maintenance works, how and when these will be done and who will be carrying out these maintenance works.
69. **Completion of Major Works** - Prior to the issue of a Final Occupation Certificate, the following works must be completed at the applicant's expense to the satisfaction of Council's Engineering Services section:
- (a) Stormwater pipes, pits and connections to public stormwater systems within the road related area;
 - (b) Driveways and vehicular crossings within the road related area;
 - (c) Removal of redundant driveways and vehicular crossings;
 - (d) New footpaths within the road related area;
 - (e) Relocation of existing power/light pole
 - (f) Relocation/provision of street signs
 - (g) New or replacement street trees;
 - (h) New footway verges, where a grass verge exists, the balance of the area between the footpath and the kerb or site boundary over the full frontage of the proposed development must be turfed. The grass verge must be constructed to contain a uniform minimum 75mm of friable growing medium and have a total cover of turf predominant within the street.
 - (i) New or reinstated kerb and guttering within the road related area; and
 - (j) New or reinstated road surface pavement within the road.

Council's Assets and Infrastructure Section must advise in writing that the works have been completed to their satisfaction prior to the issue of the Occupation Certificate. Note: The damage deposit paid to Council will not be released until the works have been completed to Council's satisfaction.

70. **Traffic Control Devices** - The internal road network, pedestrian facilities and parking facilities (including visitor parking and employee parking) shall be designated, and line marked in accordance with Australian Standard - AS1742, Manual of Uniform Traffic Control Devices.

If an exit from car park utilises a pedestrian footpath, then a warning system such as flashing light and/or 'alarm sound' must be installed on the subject property to alert pedestrians of vehicles exiting the car park. The Alarm System must be designed and installed in accordance with AS2890.1 -2004.

71. **Dilapidation Report on Public Land for Major Development Only** - Upon completion of works, a follow up dilapidation report must be prepared for the items of Council infrastructure adjoining the development site including all adjoining property.

The dilapidation report must be prepared by a professional engineer specialising in structural engineering, and include:

- (a) Photographs showing the condition of the road pavement fronting the site
- (b) Photographs showing the condition of the kerb and gutter fronting the site
- (c) Photographs showing the condition of the footway including footpath pavement fronting the site
- (d) Photographs showing the condition of retaining walls within the footway or road
- (e) Closed circuit television/video inspection (in DVD format) of public stormwater drainage systems fronting, adjoining or within the site, and
- (f) The full name and signature of the professional engineer.

The report must be provided to the PCA and a copy provided to the Council. The reports are to be supplied in electronic format in Word or PDF. Photographs are to be in colour, digital and date stamped.

NOTE: Council will use this report to determine whether or not to refund the damage deposit.

Council's Assets and Infrastructure Division must advise in writing that the works have been completed to their satisfaction prior to the issue of an Occupation Certificate.

72. **Stormwater drainage works - Works As Executed** - Prior to the issue of the Occupation Certificate, stormwater drainage works are to be certified by a professional engineer specialising in hydraulic engineering, with Works-As-Executed drawings supplied to Council detailing:

- (a) Compliance with conditions of development consent relating to stormwater;
- (b) The structural adequacy of the On-Site Detention system (OSD);
- (c) That the works have been constructed in accordance with the approved design and will provide the detention storage volume and attenuation in accordance with the submitted calculations;
- (d) Pipe invert levels and surface levels to Australian Height Datum;
- (e) Contours indicating the direction in which water will flow over land should

the capacity of the pit be exceeded in a storm event exceeding design limits.

73. **Fire Safety Certificate before Occupation or Use** - In accordance with Clause 153 of the [Environmental Planning and Assessment Regulation 2000](#), on completion of building works and prior to the issue of an Occupation Certificate, the owner must cause the issue of a Final Fire Safety Certificate in accordance with Clause 170 of the aforesaid Regulation. The Fire Safety Certificate must be in the form or to the effect of Clause 174 of the Environmental Planning and Assessment Regulation, 2000. In addition, in relation to each essential fire or other safety measure implemented in the building or on the land on which the building is situated, such a Certificate is to state:
- (a) That the measure has been assessed by a person (chosen by the owner of the building) who is properly qualified to do so.
 - (b) That as at the date of the assessment the measure was found to be capable of functioning at a standard not less than that required by the attached Schedule.

A copy of the certificate is to be given by the applicant to the Commissioner of Fire & Rescue NSW and a further copy is to be displayed in a frame and fixed to a wall inside the building's main entrance.

74. **Slip Resistance** - At completion of work an in-situ (on-site) test, in wet and dry conditions, must be carried out on the pedestrian floor surfaces used in the foyers, public corridors/hallways, stairs and ramps as well as the floor surfaces in wet rooms in any commercial/retail/residential units to ascertain the actual slip resistance of such surfaces taking into consideration the effects of grout, the gradients of the surface and changes from one material to another. The in-situ test must be carried out in accordance with AS/NZS 4663:2002. Proof of compliance must be submitted with the application for the Occupation Certificate for approval.
75. **BASIX Certificate** - All energy efficiency measures as detailed in the approved BASIX Certificate 1087636M dated 19 March 20 prepared by Greenwood Architectural Drafting in the plans approved with the Development Consent, must be implemented before issue of any Occupation Certificate.
76. **Electricity Supply** - Evidence shall be provided demonstrating that the development has been connected to the Ausgrid, if required.
77. **Post Construction Dilapidation report - Private Land** - At the completion of the construction works, a suitably qualified person is to be engaged to prepare a post-construction dilapidation report. This report is to ascertain whether the construction works associated with the subject development created any structural damage to the following adjoining premises:
- a) all adjoining properties.

The report is to be prepared at the expense of the applicant and submitted to the PCA prior to the issue of the Occupation Certificate. In ascertaining

whether adverse structural damaged has occurred to the adjoining premises, the PCA, must compare the post-construction dilapidation report with the pre-construction dilapidation report required by conditions in this consent.

Evidence confirming that a copy of the post-construction dilapidation report was delivered to the adjoining properties subject of the dilapidation report must be provided to the PCA prior to the issue of any Occupation Certificate.

78. **Allocation of car parking spaces** - Car parking associated with the development is to be allocated as follows:
- (a) Residential dwellings: fifty-five (55)
 - (b) Residential visitors: eight (8) inclusive of one (1) wash bay
79. **BASIX Compliance Certificate** - A Compliance Certificate must be provided to the PCA regarding the implementation of all energy efficiency measures as detailed in the approved BASIX Certificate, 1087636M dated 19 March 20 prepared by Greenwood Architectural Drafting before any Occupation Certificate is issued.
80. **Requirements prior to the issue of the Occupation Certificate**
The following shall be completed and or submitted to the PCA prior to the issue of the Occupation Certificate:
- (a) All the stormwater/drainage works shall be completed in accordance with the approved Construction Certificate plans prior to the issue of the Occupation Certificate.
 - (b) The internal driveway construction works, together with the provision for all services (conduits and pipes laid) shall be completed in accordance with the approved Construction Certificate plans prior to the issue of the Occupation Certificate.
 - (c) Construct any new vehicle crossings required.
 - (d) Replace all redundant vehicle crossing laybacks with kerb and guttering and replace redundant concrete with turf.
 - (e) Work as Executed Plans prepared by a Chartered Professional Engineer or a Registered Surveyor when all the site engineering works are complete shall be submitted to the PCA prior to the issue of the Occupation Certificate.
81. **Completion of Landscape Works** - All landscape works must be completed before the issue of the Final Occupation Certificate. All landscape works, the planting of twenty eight (28) trees and the fee payment for street tree planting must be completed before the issue of the Final Occupation Certificate and to the satisfaction of Councils Tree Management Officers and in accordance with approved landscape plans and specifications, drawn by Michael Siu Landscape Architecture.
- a) A certificate of compliance for the planting of all twenty eight (28) trees and shrubs proposed for the site. An AQF 5 Horticulturist shall be engaged and in writing certify that all trees have been planted as per landscape plan and specifications and forwarded to the PCA – Principal Certifying Authority.

82. **Tree Protection Measures** - A final certificate of compliance letter, once all building and landscape works have been completed, from the engaged AQF 5 Consulting Arborist, that tree protection measures have been installed and maintained for the entirety of the project and report on the condition of the trees that as part of this Consent, were to be protected and retained.

A copy of the Hurstville City Council's Tree Removal and Pruning Guidelines and Kogarah City Council, Street Tree Management Strategy, Masterplan, and Tree Management Policy 2019, can be downloaded from Council's website www.georgesriver.nsw.gov.au.

83. **Section 73 Compliance Certificate** - A Section 73 Compliance Certificate under the [Sydney Water Act 1994](#) must be submitted to the PCA prior to the issue of the Occupation Certificate.
84. **Dilapidation Report on Public Land for Major Development** - Upon completion of works, a follow up dilapidation report must be prepared for the items of Council infrastructure adjoining the development site:

The dilapidation report must be prepared by a professional engineer specialising in structural engineering, and include:

- (a) Photographs showing the condition of the road pavement fronting the site
- (b) Photographs showing the condition of the kerb and gutter fronting the site
- (c) Photographs showing the condition of the footway including footpath pavement fronting the site
- (e) Photographs showing the condition of retaining walls within the footway or road
- (f) The full name and signature of the professional engineer.

The report must be provided to the PCA and a copy provided to the Council. The reports are to be supplied in electronic format in Word or PDF. Photographs are to be in colour, digital and date stamped.

NOTE: Council will use this report to determine whether or not to refund the damage deposit.

Council's Engineering Services Division must advise in writing that the works have been completed to their satisfaction prior to the issue of an Occupation Certificate.

Operational Conditions (Ongoing)

85. **Waste** - The property requires 18 x 240L waste bins and 18 x 240L recycling bins. All bins must be taken to kerbside for collection.
86. **Waste requirements** - Occupational Health and Safety issues such as slippery floors in waste rooms and the weight of the waste and recycling receptacles will need to be monitored. Cleaners will monitor the bin storage area and all spills will be attended to immediately by cleaners.

87. **Noise Control** - The use of the premises must not give rise to the transmission of offensive noise to any place of different occupancy. Offensive noise is defined in the [Protection of the Environment Operations Act 1997](#) (as amended).
88. **Hours of operation – limitation of roof top communal open space** - The approved hours of operation shall be restricted to the following:
Monday – Sunday - 7.00am to 9.00pm.
89. **Lighting - General Nuisance** - Any lighting on the site shall be designed so as not to cause a nuisance to other residences in the area or to motorists on nearby roads and to ensure no adverse impact on the amenity of the surrounding area by light overspill or glare.
Flashing, moving or intermittent lights or signs are prohibited.
90. **Activities and storage of goods outside buildings** - There shall be no activities including storing or depositing of any goods or maintenance to any machinery external to the building with the exception of waste receptacles.
91. **Loading & Unloading of vehicles** - All loading and unloading of vehicles in relation to the use of the premises shall take place wholly within a dedicated loading dock/area.
92. **Entering & Exiting of vehicles** - All vehicles shall enter and exit the premises in a forward direction.
93. **Annual Fire Safety Statement** - The owner of the building premises must ensure the Council is given an annual fire safety statement in relation to each essential fire safety measure implemented in the building. The annual fire safety statement must be given:
- (a) Within 12 months after the date on which the fire safety certificate was received.
 - (b) Subsequent annual fire safety statements are to be given within 12 months after the last such statement was given.
 - (c) An annual fire safety statement is to be given in or to the effect of Clause 181 of the [Environmental Planning and Assessment Regulation 2000](#).
 - (d) A copy of the statement is to be given to the Commissioner of Fire & Rescue NSW, and a further copy is to be prominently displayed in the building.
94. **Maintenance of Landscaping** - All trees and plants forming part of the landscaping must be maintained. Maintenance includes watering, weeding, removal of rubbish from tree bases, fertilizing, pest and disease control, replacement of dead or dying plants and any other operations required to maintain healthy trees, plants and turfed areas.
95. **Amenity of the neighbourhood** - The implementation of this development shall not adversely affect the amenity of the neighbourhood or interfere unreasonably with the comfort or repose of a person who is outside the premises by reason of the emission or discharge of noise, fumes, vapour, odour, steam, soot, dust, waste water, waste products, grit, oil or other

harmful products.

96. **Use of Rooftop open space** - A Plan of Management (POM) for use of rooftop open space must be submitted for approval of Council. The POM must outline the:
- (i) hours of use of the rooftop communal open space shall be restricted from 7.00am until 9.00pm seven days a week;
 - (ii) a maximum number of ten (10) users at any one time;
 - (iii) provisions for no amplified music to be played;
 - (iv) and identify other measures to ensure that the amenity of persons within the development and in nearby existing and future development is maintained;
 - (v) The approved POM shall be incorporated into the Owners Corporation by-laws in any future Strata subdivision and a sign in the front entry of the building shall be included to ensure the use of this space is monitored and understood by all occupants.

Operational Requirements Under The Environmental Planning & Assessment Act 1979

97. **Requirement for a Construction Certificate** - The erection of a building must not commence until a Construction Certificate has been issued.
98. **Appointment of a PCA** - The erection of a building must not commence until the applicant has:
- (a) appointed a PCA for the building work; and
 - (b) if relevant, advised the PCA that the work will be undertaken as an Owner -Builder.

If the work is not going to be undertaken by an Owner - Builder, the applicant must:

- (a) appoint a Principal Contractor to undertake the building work. If residential building work (within the meaning of the Home Building Act 1989) is to be undertaken, the Principal Contractor must be a holder of a contractor licence; and
- (b) notify the PCA of the details of any such appointment; and
- (c) notify the Principal Contractor of any critical stage inspections or other inspections that are required to be carried out in respect of the building work.

An Information Pack is attached for your convenience should you wish to appoint Georges River Council as the PCA for your development.

99. **Notification Requirements of PCA** - No later than two days before the building work commences, the PCA must notify:
- (a) the consent authority and the Council (if not the consent authority) of his or her appointment; and
 - (b) the applicant of the critical stage inspections and other inspections that

are to be carried out with respect to the building work.

100. **Notice of Commencement** - The applicant must give at least two days notice to the Council and the PCA of their intention to commence the erection of a building. A Notice of Commencement Form is attached for your convenience.
101. **Critical Stage Inspections** - The last critical stage inspection must be undertaken by the PCA. The critical stage inspections required to be carried out vary according to Building Class under the Building Code of Australia and are listed in Clause 162A of the Environmental Planning and Assessment Regulation 2000.
102. **Notice to be given prior to critical stage inspections** - The principal contractor for a building site, or the owner-builder, must notify the PCA at least 48 hours before each required inspection needs to be carried out.

Where Georges River Council has been appointed as the PCA, 48 hours notice in writing, or alternatively 24 hours notice by facsimile or telephone, must be given when specified work requiring inspection has been completed.

103. **Occupation Certificate** - A person must not commence occupation or use of the whole or any part of a new building unless an Occupation Certificate has been issued in relation to the building or part.
Only the PCA appointed for the building work can issue the Occupation Certificate.
An Occupation Certificate Application Form is attached for your convenience.

Prescribed Conditions

104. **Clause 97A - BASIX Commitments** - This Clause requires the fulfilment of all BASIX Commitments as detailed in the BASIX Certificate to which the development relates.
105. **Clause 98 - Building Code of Australia & Home Building Act 1989** - Requires all building work to be carried out in accordance with the Building Code of Australia. In the case of residential building work to which the Home Building Act 1989 relates, there is a requirement for a contract of insurance to be in force before any work commences.
106. **Clause 98A - Erection of Signs** - Requires the erection of signs on site and outlines the details which are to be included on the sign. The sign must be displayed in a prominent position on site and include the name and contact details of the PCA and the Principal Contractor.
107. **Clause 98B - Home Building Act 1989** - If the development involves residential building work under the Home Building Act 1989, no work is permitted to commence unless certain details are provided in writing to Council. The name and licence/permit number of the Principal Contractor or Owner Builder and the name of the Insurer by which work is insured under Part 6 of the Home Building Act 1989.
108. **Clause 98E - Protection & support of adjoining premises** - If the

development involves excavation that extends below the level of the base of the footings of a building on adjoining land, this prescribed condition requires the person who benefits from the development consent to protect and support the adjoining premises and where necessary underpin the adjoining premises to prevent any damage.

109. **Clause 98E - Site Excavation** - Excavation of the site is to extend only to that area required for building works depicted upon the approved plans. All excess excavated material shall be removed from the site.

All excavations and backfilling associated with the erection or demolition of a building must be executed safely and in accordance with appropriate professional standards.

All excavations associated with the erection or demolition of a building must be properly guarded and protected to prevent them from being dangerous to life or property.

If the soil conditions require it, retaining walls associated with the erection or demolition of a building or other approved methods of preventing movement of the soil shall be provided and adequate provision shall be made for drainage.

END OF CONDITIONS

NOTES/ADVICES

110. **Review of Determination** - Section 8.2 of the Environmental Planning and Assessment Act confers on an applicant who is dissatisfied with the determination of the application the right to lodge an application with Council for a review of such determination. Any such review must however be completed within 6 months from its determination. Should a review be contemplated sufficient time should be allowed for Council to undertake public notification and other processes involved in the review of the determination.

Note: Review provisions do not apply to Complying Development, Designated Development, State Significant Development, Integrated Development or any application determined by the Sydney South Planning Panel or the Land & Environment Court.

111. **Appeal Rights** - Part 8 (Reviews and appeals) of the Environmental Planning and Assessment Act 1979 confers on an applicant who is dissatisfied with the determination of the application a right of appeal to the Land and Environment Court of New South Wales.

112. **Lapsing of Consent** - This consent will lapse unless the development is physically commenced within 5 years from the Date of Operation of this consent, in accordance with Section 4.53 of the Environmental Planning and Assessment Act 1979 as amended.

113. **Access to NSW Legislations (Acts, Regulations and Planning**

Instruments) - NSW legislation can be accessed free of charge at www.legislation.nsw.gov.au

114. **Principal Certifier** - Should the Council be appointed as the Principal Certifier in determining the Construction Certificate, the building must comply with all the applicable deemed to satisfy provision of the BCA. However, if an alternative solution is proposed it must comply with the performance requirements of the BCA, in which case, the alternative solution, prepared by an appropriately qualified fire consultant, accredited and having specialist qualifications in fire engineering, must justifying the non-compliances with a detailed report, suitable evidence and expert judgement. Council will also require if deemed necessary, for the alternative solution to undergo an independent peer review by either the CSIRO or other accredited organisation. In these circumstances, the applicant must pay all costs for the independent review.
115. **Energy Efficiency Provisions - Energy Efficiency Provisions** - Should Council be appointed as the Principal Certifier, a report prepared and endorsed by an Energy Efficiency Engineer or other suitably qualified person must be submitted, detailing the measures that must be implemented in the building to comply with Section J of the BCA. The proposed measures and feature of the building that facilitate the efficient use of energy must be identified and detailed on the architectural plans. At completion of the building and before the issue of an Occupation Certificate, a certificate certifying that the building has been erected to comply with the energy efficiency provisions must be submitted to the Principal Certifier.
116. **Compliance with Access, Mobility and AS4299** - Adaptable Housing - Should the Council be appointment as the PCA, the Construction Certificate Application must be accompanied by detailed working plans and a report or a Certificate of Compliance from an Accredited Access Consultant certifying that the building design and access to the adaptable units complies with Council's DCP and AS 4299 Adaptable Housing.
117. **Noise** - Noise related conditions - Council will generally enforce noise related conditions in accordance with the Noise Guide for Local Government (<http://www.environment.nsw.gov.au/noise/nglg.htm>) and the Industrial Noise Guidelines (<http://www.environment.nsw.gov.au/noise/industrial.htm>) publish by the Department of Environment and Conservation. Other state government authorities also regulate the Protection of the Environment Operations Act 1997.

Useful links relating to Noise:

- (a) Community Justice Centres - free mediation service provided by the NSW Government (www.cjc.nsw.gov.au).
- (b) Department of Environment and Conservation NSW, Noise Policy Section web page (www.environment.nsw.gov.au/noise).
- (c) New South Wales Government Legislation home page for access to all NSW legislation, including the Protection of the Environment Operations Act 1997 and the Protection of the Environment Noise Control Regulation 2000 (www.legislation.nsw.gov.au).

- (d) Australian Acoustical Society - professional society of noise-related professionals (www.acoustics.asn.au/index.php).
 - (e) Association of Australian Acoustical Consultants - professional society of noise related professionals (www.aaac.org.au).
 - (f) Department of Gaming and Racing - (www.dgr.nsw.gov.au).
118. **Acoustical Engineer Contacts & Reference Material** - Further information including lists of Acoustic Engineers can be obtained from:
- (a) Australian Acoustical Society - professional society of noise-related professionals (www.acoustics.asn.au)
 - (b) Association of Australian Acoustical Consultants - professional society of noise related professionals (www.aaac.org.au)
 - (c) NSW Industrial Noise Policy - Office of Environment & Heritage (www.environment.nsw.gov.au)
119. **Strata Subdivisions**
- (a) Council will check the consent conditions on the relevant Strata Subdivision consent. Failure to submit the required information will delay endorsement of the plan of subdivision.
 - (b) Council will undertake the required inspections to satisfy the requirements of the Strata Schemes Development Regulation 2016 to determine the Strata Certificate.
 - (c) Strata Plans, Administration Sheets, 88B Instruments and copies must not be folded.
 - (d) All Strata Plans, Strata Plan Administration Sheets and 88B Instruments shall be submitted to Council enclosed in a protective cardboard tube (to prevent damage during transfer).
120. **Sydney Water Section 73 Certificates** - The Section 73 Certificate must be a separate certificate that relates specifically to this development consent. For example, if the development consent relates to the subdivision of the land, a Section 73 Certificate for the construction of the building that is subject to a different development consent will not suffice.
121. **Electricity Supply** - This development may need a connection to the Ausgrid network which may require the network to be extended or its capacity augmented. You are advised to contact Ausgrid on 13 13 65 or www.ausgrid.com.au (Business and Commercial Services) for further details and information on lodging your application to connect to the network.
122. **Disability Discrimination Act** - This application has been assessed in accordance with the Environmental Planning and Assessment Act 1979. No guarantee is given that the proposal complies with the Disability Discrimination Act 1992. The applicant is responsible to ensure compliance with this and other anti-discrimination legislation. The Disability Discrimination Act 1992 covers disabilities not catered for in the minimum standards called up in the Building Code of Australia which refers to AS1428.1-Design for Access and Mobility.

123. **Council as PCA - Total Conformity with BCA - Accompanying Information** - Should the Council be appointed as the Principal Certifier, the Construction Certificate Application must be accompanied by the following details, with plans prepared and certified by an appropriately qualified person demonstrating compliance with the BCA:

- a) Mechanical ventilation to bathroom, laundry and basement areas not afforded natural ventilation.
- b) Fire-fighting services and equipment including hydrant systems and booster assembly location, sprinkler and valve room systems, hose reels, portable fire extinguishers, smoke hazard management systems, sound and warning systems.
- c) Emergency lighting and exit signs throughout, including communal open space areas, lobby/foyer and basement areas.
- d) Construction of all fire doors including warning and operational signage to required exit and exit door areas.
- e) Egress travel distances to exits and the discharge from fire isolated exits including the swing of exit doors.
- f) The spandrel protection of openings in external walls
- g) The protection of paths of travel from a fire isolated exit when passing within 6m of an opening within the external wall of the building.
- h) Fire compartmentation and fire wall separation details including all stairway, lift and service shaft areas.
- i) The location and construction of an electricity substation, including the location and smoke separation of electrical distribution boards.
- j) Sound transmission and insulation details.
- k) Window schedule is to include the protection of openable windows.

In this regard, detailed construction plans and specifications that demonstrate compliance with the above requirements of the BCA must be submitted to the Principal Certifier with the Construction Certificate Application. Should there be any non-compliance, an alternative method of fire protection and structural capacity must be submitted, with all supporting documents prepared by a suitably qualified person.

In the event that full compliance with the BCA cannot be achieved and the services of a fire engineer are obtained to determine an alternative method of compliance with the BCA, such report must be submitted to and endorsed by the Principal Certifier prior to issue of the Construction Certificate.

124. **Long Service Levy** - The Long Service Corporation administers a scheme which provides a portable long service benefit for eligible workers in the building and construction industry in NSW. All benefits and requirements are determined by the Building and Construction Industry Long Service Payments Act 1986. More information about the scheme and the levy amount you are required to pay to satisfy a condition of your consent can be found at <http://www.longservice.nsw.gov.au>.

The required Long Service Levy payment can be direct to the Long Service Corporation via their web site <https://online.longservice.nsw.gov.au/bci/levy>. Payments can only be processed on-line for the full levy owing and where the value of work is between \$25,000 and \$6,000,000. Payments will be accepted

for amounts up to \$21,000, using either MasterCard or Visa.

125. **Security deposit administration & compliance fee** - Under Section 97 (5) of the Local Government Act 1993, a security deposit (or part) if repaid to the person who provided it is to be repaid with any interest accrued on the deposit (or part) as a consequence of its investment.

Council must cover administration and other costs incurred in the investment of these monies. The current charge is \$50.00 plus 2% of the bond amount per annum.

The interest rate applied to bonds is set at Council's business banking facility rate as at 1 July each year. Council will accept a bank guarantee in lieu of a deposit.

All interest earned on security deposits will be used to offset the Security Deposit Administration and Compliance fee. Where interest earned on a deposit is not sufficient to meet the fee, it will be accepted in full satisfaction of the fee.

126. **Site Safety Fencing** - Site fencing must be erected in accordance with SafeWork Guidelines, to exclude public access to the site throughout the demolition and/or construction work, except in the case of alterations to an occupied dwelling. The fencing must be erected before the commencement of any work and maintained throughout any demolition and construction work.

A demolition licence and/or a high risk work license may be required from SafeWork NSW (see www.SafeWork.nsw.gov.au).

127. **Stormwater & Ancillary Works - Applications under Section 138 Roads Act and/or Section 68 Local Government Act 1993** - To apply for approval under Section 138 of the Roads Act 1993 and/or Section 68 Local Government Act 1993:

- (a) Complete the Stormwater Drainage Application Form which can be downloaded from Georges River Council's website at www.georgesriver.nsw.gov.au.
- (b) In the Application Form, quote the Development Consent No. (eg DA2018/0***) and reference this condition number (eg Condition 23)
- (c) Lodge the application form, together with the associated fees at Council's Customer Service Centre, during business hours. Refer to Council's adopted Fees and Charges for the administrative and inspection charges associated with stormwater applications.

The developer must meet all costs of the extension, relocation or reconstruction of any part of Council's drainage system (including design drawings and easements) required to carry out the approved development.

The preparation of all engineering drawings (site layout plans, cross sections, longitudinal sections, elevation views together with a hydraulic grade analysis) and specifications for the new stormwater drainage system to be arranged by

the applicant. The design plans must be lodged and approved by Council prior to the issue of a Construction Certificate.

NOTE: A minimum of four weeks should be allowed for assessment.
