Development No.DA2020/0358

I have recently spoken to a neighbour regarding the proposed change of use of the property at 7 Rickard Road South Hurstville. It appears she was notified of a meeting that was to take place at the Council Chambers. I received no such notification and yet like my neighbour I will be impacted by the proposed changes at that property. This street has become increasingly impacted by increased traffic flow., partly because of the Catholic College in Greenacre Road and partly due to increased housing density. Obviously, I accept that it is inevitable that development in this area will and has increased over time. However, it is a quantum leap for a premises which has been up to now used for private devotional activities to now be used by the sect for public use. There is limited parking at the site and despite assurances that devotees will be bused in it is inevitable that private cars will also be used. As you are aware a block of 14 units has just been developed right next door and this will only add to the traffic congestion. The residents in this street understand that development is inevitable, but enough is enough this is no place for chanting and the like it flies in the face of our right to "quiet enjoyment"of our homes. Let all of us continue in that manner.
